DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, and 25-30, drawn to an apparatus of a motor, classified in class 310, subclass 43.
 - II. Claims 16-24, and 31-39, drawn to method of forming a motor, classified in class 310, subclass 596.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the apparatus of the group I does not require the process/method steps of the group II for practicing the claimed invention of group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Elchuk on 05/31/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
